

VAIBHAV DURGAD

Senior Data Analyst

+91 7337802522 • vaibhavsurgad45@gmail.com • Bangalore, India • [LinkedIn](#)

Summary

Senior Data Analyst with 4+ years of experience specializing in Power BI, SQL, Python, and Azure Databricks. Experienced in data extraction, transformation, and modeling to deliver actionable business insights. Skilled in process improvement and driving revenue through data-driven decision-making. Committed to continuous learning and staying updated with industry developments.

Skills

BI & Visualization: Power BI (DAX, Power Query, RLS), Power BI Service.

Programming & Analytics: Python (Pandas, NumPy, Matplotlib), Data Cleaning, Exploratory Data Analysis (EDA), Data Transformation, Automation Scripts.

Databases: SQL Server, Stored Procedures, Functions, Tables, Query Optimization.

Cloud & Big Data: Azure SQL, Azure Databricks, Azure Delta Lake, Azure Data Factory.

ETL & Data Engineering: Data Modeling, Data Validation, Incremental Loads.

Tools & Platforms: SSMS, Jupyter Notebook, Azure Databricks

Experience

MDIndia Health Insurance TPA Pvt.Ltd

Senior Data Analyst

01/2024 - Present

- Built interactive dashboards and KPIs using **DAX**, **Bookmarks**, and **Dataflow**, improving reporting accuracy and accessibility for business teams
- Implemented **Incremental Refresh**, **Row-Level Security (RLS)**, and managed Workspaces, **Gateways**, and **Scheduled refreshes** in **Power BI Service**
- Enhanced SQL queries, indexes, tables, and stored procedures** for improved database performance and **faster data retrieval**
- Built ETL processes using **Python (Pandas, NumPy)** for data extraction, cleaning, transformation, and loading into SQL Server and Power BI datasets.
- Ensured high-quality datasets by implementing **data validation, anomaly detection, and data quality** checks using SQL and Python for accurate analytics and decision-making.

Value Chain Solutions India Pvt.Ltd

10/2022 - 11/2023

Data Analyst - client, Zydus

- Used Power BI and SQL for analyzing, transforming, and visualizing large datasets from multiple data sources
- Created **advanced SQL scripts** for data manipulation, aggregation, and analytical calculations
- Automated data pipelines** to maintain accuracy, consistency, and timeliness of critical business reports

07/2021 - 10/2022

SQL Developer - client, BASF

- Designed, implemented, and maintained relational databases to support web applications
- Optimized SQL queries and execution plans to improve data processing efficiency
- Developed efficient **CTEs, triggers, and views** to ensure data consistency and system reliability
- Collaborated with web developers to integrate SQL databases with web applications

Education

BLDEA's V P Dr. P.G. Halakatti College of Engineering & Technology

07/2016-08/2020

Bachelor's Degree in Mechanical Engineering

Projects

- Built **interactive Power BI dashboards** by combining **MySQL, Excel, and MSSQL (~4M records)** to provide **insights** across **finance, sales, and insurance**; used **DAX measures, Power Query**, and **scheduled/incremental refresh** for **reporting**.
- Created **master tables (Users, Policies, and Claims)** and **summary/feature tables (Features, Predictions)** with **SQL queries** and **stored procedures** to support **reporting** and **analytics** for a **health insurance web application**.
- Extracted data from insurance companies, performed **data cleaning and transformation using Python**, and used **automation scripts** to load processed data into **SQL Server**.

Certification

Jovian

Data Analysis with Python: Zero to Pandas
