

KAVERI ALADI

SQL Developer

+91 9606461793 • kavyaaladi1@gmail.com • Bangalore, India • [LinkedIn](#)

Summary

SQL Developer with 1 year of experience in designing, developing, and maintaining relational databases to support enterprise and web-based applications. Proficient in SQL Server and database querying, performance optimization, and report generation. Possess basic knowledge of Java and Spring Boot for backend integration. A collaborative team player eager to contribute to data-driven solutions and organizational success.

Skills

Databases: SQL Server, MySQL

SQL Skills: Joins, Sub queries, Views, Indexes, Stored Procedures, Triggers

Advanced SQL: Aggregation Functions, Window Functions, Query Optimization

Backend (Basic): Java, Spring Boot

Frontend (Basic): HTML, CSS, JavaScript

Tools: MS Excel, MS Word

Experience

SQL Developer

MDIndia Health Insurance TPA Pvt. Ltd.

Pune, India | 02/2025 – Present

- Designed, executed, and maintained **relational database structures** to support claim management and reporting systems.
- Developed **complex SQL queries** to generate claim summary reports categorized by **Insurance Company, Broker, Corporate, and Policy**.
- Created and managed **SQL Server tables**, indexes, and constraints to ensure **data integrity and consistency**.
- Performed **SQL performance tuning and query optimization** to improve report execution time and data retrieval efficiency.
- Enhanced **stored procedures, views, and triggers** to automate data processing and reporting logic.
- Collaborated with backend developers to integrate SQL databases with **Java Spring Boot applications**.
- Supported front-end reporting modules by providing optimized SQL queries and datasets.

Education

KLE's S.K Arts & H.S.K Science Institute Vidyanagar, Hubli, Karnataka

06/2020-08/2023

Bachelor of Science in PCM

PC Jabin PU College of Science, Hubli

06/2018-05/2020

PUC

SSRS Girls High School, Hubli

06/2017-05/2018

SSLC

Projects

Hotel Management System

06/2024 – 07/2024

- Designed and applied a normalized **MySQL database schema** for managing hotels, users, menus, orders, and payments.
- Expanded **complex SQL queries** for order tracking, revenue reports, and customer activity analysis.
- Created **stored procedures and views** to simplify data retrieval and improve maintainability.
- Implemented **aggregation and window functions** to generate daily and monthly sales reports.
- Ensured data consistency and integrity **using primary keys, foreign keys, and constraints**.
- Integrated the database with a **Java-based backend using basic Java, Servlets, and Spring MVC**.
- Improved system efficiency by **optimizing queries and indexing frequently accessed columns**.
